

SUMMER NEWS-LETTER

Welcome to the summer news letter from the Point Source Productions team. In this news letter we are able to tell you about the new additions to our hire stock and any new developments within the company. www.pslx.co.uk

Unit 2 Comes Online

As you may know, last year we took over the whole building, moving the offices and warehouse to fit everything in! As you can see from the picture opposite we have run out of room again. We have no plans to move at the moment so we have taken over another unit in front of our existing premises. This has enabled us to house the new additions below, and will give us room to expand.

SALES Studio Beam HPL 575 SALES

The HPL 575 Studio Beam offers a lot of light for it's power requirements. It comes complete with a set of lenses for the very small amount of just £68.00

Source 4 Juniors

Whilst we've had its parents in hire stock for a long time, we have now taken delivery of the kids too! Introducing the Source 4 Junior as an alternative to conventional 500 Watt profiles. When you go into a venue with a limited power supply and you have a limited budget you need the light output of a HPL 575 profile but can't afford a Source 4. This is where the Source 4 Junior comes into it's own. It has the HPL 575 lamp with low power consumption and high light output for just £12.00 a week.

Rat Stands

Rat stands are something we can't have enough of so we've been out with the shopping trolley and filled it up. Now when you ring up to hire them we'll have them in stock (not guaranteed). At the low low price of £6.50 week what more can you want.

Studio Beam MSR 575

It's an exhibition grade MSR PAR but it's at theatre prices. These Studio Beam lanterns use a 575 MSR discharge lamp, giving you that extra bit of sparkle. These lanterns are perfect for non-dimmable corporate lighting effects and are at home floor, or bar suspended.

Prices
£30.00 Day
£60.00 Week

Rosco Image Pro

We have taken delivery of Rosco's ImagePro gobo slide projectors. In short, the ImagePro projects an image created from a simple plastic slide. Attach an iPro Slide cartridge to the back plate of the ImagePro™ and insert it into the iris slot of any one of several common luminaires. Then simply turn on the light to project anything from a dazzling full color panorama to a corporate logo, or even a last minute custom gobo texture. £25.00 Week. Slide Kits £25.00.

Moving Lights

We have now added the Mac 250+ to our ever popular moving light range. The Mac 250+ enables you to index your gobos making sure the text can always be read or the arrow is pointing the right way. We have also expanded our moving light desks by adding the Zero88 Leap Frog which has the ability of controlling 24 moving lights along with 48 standard channels of dimming.

Steeldeck Staging

We have more than quintupled the amount of steeldeck we have in our hire stock. Not only can we build you a basketball court but we will have enough left over to build the seating and steps.

Price Guide.	
8 x 4	£12.00
8 x 2	£15.00
8 x 3	£15.00
4 x 4	£15.00
